

IVBW19

International Veterinary Biosafety
Workgroup Meeting

18-21 February 2019

Wellington, New Zealand

The International Veterinary Biosafety Workgroup brings together duty holders from veterinary high containment facilities, vaccine production facilities, and select few human level 4 containment facilities with the aim of promoting best practice in microbiological biocontainment and safety in veterinary laboratories that have national responsibility for the health of large animals, and which operate at biosafety level 3 and 4.

Conference themes

- Updates from world leading biocontainment facilities
- Reports on new builds and renovations
- Inactivation of microorganisms, methods and validation
- Transport of microorganisms by air
- Biosafety and genetic modification
- International transfer of biological materials
- Biosafety and biocontainment standards
